Background and reasons for the proposal

The board finds that it is in the interest of all shareholders that the Participants, who have been deemed important to the further development of the Company, have a long-term interest in a good value development of the Company's shares. A long-term ownership engagement is expected to stimulate an increased interest in the business and overall performance development, and to increase the motivation of the Participants, with the aim of achieving increased interest community between the Participants and the Company's shareholders.

Preliminary valuation

The preliminary and final warrant premium is calculated using the Black & Scholes valuation model, assuming a risk-free rate of 2.712 percent and a volatility of 34.2 percent, and taking into account that no expected dividends or other value transfers to shareholders will occur during the term of the program. The basis and calculations have been developed and carried out by Optionspartner AB as an independent valuation institute. The calculated subscription price has been rounded to the nearest whole penny.
